

A Green Change Agent is a person whose presence, actions or thought processes cause a change from the conventional way of handling or thinking about the protection of the environment.

Energy Conservation

WELCOME

The Archetype Sustainable House at The Living City Campus (located just north of Toronto) at Kortright demonstrates viable, sustainable housing. Through education, training, market transformation and partnership programs it will influence how communities are built, planned, constructed and lived-in to minimize ecological footprints and improve people's quality of life.

Cost: FREE for Green Change Agents or \$45
Date: Fridays & Saturdays, 9:00 a.m. to 1:00 p.m.
Duration: 3 hours
Location: Kortright Centre, 9550 Pine Valley Drive
Facilitated by: Toronto Region and Conservation Authority

Session Overview:

This three-hour session gives an overview of general concepts, resources, technologies and practices of Green Energy for domestic use. As we explore the Green Archetype House, participants will gain a better understanding of what are greenhouse gas emissions, learn about energy sources and energy conservation and understand the building construction and lifecycle. Technologies covered in this program include solar (photovoltaic) and wind electrical energy and domestic solar hot water and pool heating systems. Motivations such as energy independence, energy security, environmental impact and economic investment for using each technology will be discussed. The local resources that are needed for each technology are also brought into the decision making process. Participants will tour the onsite systems that help power the Kortright Centre.

Participants meet at 4400 Jane Street and carpool to the location

Tel.: (416) 663-2733 x 411
